WMCHealth Mental Health Specialists to Provide Consultative Services at Andrus Through a New Community Partnership

VALHALLA, N.Y. (October 24, 2023) – In a new partnership that will advance mental health services in Westchester County and the Hudson Valley, Westchester Medical Center Healtah Network (WMCHealth) behavioral health physicians will now provide care to children and adolescents at Andrus, which has a residence and school for K – 9 students that provides a range of preventive and restorative services for children and families across the tri-state area.

For this community collaboration that will have a positive impact on the well-being of local children with special needs, WMCHealth will provide child and adolescent psychiatrists for weekday consultations and treatments at both the Andrus residence and its Orchard School, which serves about 150 students. The same WMCHealth behavioral health specialists will also care for children at Andrus's health and wellness centers, which serve over 5,000 children and adults throughout Westchester.

The two organizations solidified the partnership at a recent ceremony on the Andrus campus on North Broadway in Yonkers/Hastings.
